
Marine Loss Control (MLCE)

Marine Loss Control Engineering is one of the most important offerings of Tata AIG's Marine policies. It helps get our Assureds' products delivered on time and in undamaged condition to their clients.

- This avoids loss of market share, products liability claims, and protects the brand integrity of the client.
- This is achieved by scientific analysis, tailor-made recommendations and cost effective and sellable solutions provided by an experienced and full time dedicated team spread across the globe spanning different time zones.
- MLCE helps our clients be more profitable by reducing loss frequency and severity and by giving value added service.
- Provide timely and accurate information on worldwide and regional industry trends, high risk areas, potential hazards and threats.
- Use of a well identified network of surveyors and security advisors that report under AIG standards
- Direct contact with the different transport vendors and security providers
- True involvement / Open to feedback / Constant Follow up
